

## POINT SOLUTIONS GROUP JOINS CERNER, TECHNOLOGY AND SYSTEM INTEGRATION LEADERS TO MODERNIZE VETERANS' ELECTRONIC HEALTH RECORDS

**Denver, Colorado – Oct. 3, 2018** – Point Solutions Group announced today it is joining Cerner, a global leader in healthcare technology, and other industry leaders and innovators to help make seamless care available to the nation's veterans. This newly formed team announced by Cerner will bring extensive experience in large enterprise systems and commercial sectors to modernize the U.S. Department of Veterans Affairs (VA) electronic health record (EHR).

“First and foremost, I am honored that Point Solutions Group will be working alongside some of the most talented individuals and organizations to help deliver on Cerner's vision,” said Paige Goss, Founder and President of Point Solution Group. “But just as importantly, we are thrilled to bring our technical expertise, collaborative thinking, and innovation that allows us fast action and decision making when shaping technical programs and teams.”

In addition to Cerner, Point Solutions Group will join Leidos, Guidehouse, Accenture, Henry Schein, Inc., AbleVets LLC, MicroHealth, ProSource360 and 17 additional small businesses – many of which are veteran-owned – to form the team that will provide experience and expertise to the VA implementation.

“We are proud Point Solutions Group will be part of this important team of industry leaders that will shape the future of care for veterans through a modern EHR system,” said Travis Dalton, president, Cerner Government Services. “We will work together to address the needs and capabilities that are in the best interest of the VA. Our veterans deserve the highest quality care and with this team, we look forward bringing a modern, seamless system to those who have served our country.”

In May, Cerner announced an historic agreement and VA made the program one of their top priorities to improve care for veterans. Using technology that has been deployed successfully at Department of Defense (DoD) medical facilities and thousands of provider sites globally, Cerner

plans to provide seamless care across the VA's high-performing integrated network, including VA facilities, community providers and DoD facilities.

Point Solutions Group will join Cerner and other VA EHR modernization members to outline the strategy during the [Cerner Health Conference](#), Oct. 8-11, in Kansas City, Mo.
